Dear Sir/Madame,

We are students of the 3<sup>rd</sup> Lyceum Komotini, the biggest school of a border and multicultural region of Greece where different cultures, languages and religions encounter. In our county respect to the different comes to practice every day. One of the prerequisites for the above to be feasible is the profound knowledge of our traditions, our history and our system of values. We strongly believe that our obligations support our rights and because that it is our duty to claim the return of the Parthenon Sculptures. However, as Seferis says, "*our great poet awarded with the Nobel prize, the sculptures are deep inside their territory, they have their own soul.*" We welcome you to the great family of Hellenism, classic education and humanism and send you an invitation of offering hospitality on your way bringing back all these you might consider as just marbles and we, as a heavy heritage.

With respect

The students and the responsible teachers for the program
